COLLEGIATE AND PREPARATORY DEPARTMENTS.

TERMS OF ADMISSION, COURSE OF INSTRUCTION,
EXPENSES, SESSIONS, &c., &c.

Admission to the College.

Candidates for admission into the Freshman Class, must be prepared to sustain an approved examination upon English Grammar, Arithmetic and Geography, Latin and Greek Grammars, the introductory books of the Latin and Greek courses, including *Liber Primus*, Cæsar's *Commentaries*, Virgil, and Jacob's Greek Reader, or other Greek and Latin authors equivalent to these, and upon Algebra as far as through equations of the first degree. Some preparation in Geometry, though not *required*, is highly important, and earnestly recommended. Davis' Elementary works on Algebra and Geometry are the best for preparation to enter the Freshman Class.

A candidate for an advanced standing, whether from another College or not, in addition to the preparatory studies, is examined in the various branches to which the class he proposes to enter has attended. Students; who, from want of means, or from other considerations, may desire to take an irregular course, have the privilege of doing so, provided the assent of their parents or guardians shall be first obtained. All applicants for admission are required to present testimonials of good moral character and, if from other colleges, certificates of good standing and regular dismissal.

Course of Instruction.

FRESHMEN.

FIRST SESSION.

Livy, (Lincoln's),
Latin Grammar, (Bullions') reviewed,
Arnold's Latin Prose Composition,
Xenophon's Anabasis,
Greek Grammar, (Bullions') reviewed,
Arnold's Greek Prose Composition,
English Composition,
Declamation,
Algebra, (Davies' Bourdon.)

SECOND SESSION.

Cicero's Orations,
Herodotus and Thucydides,
Arnold's Latin and Greek Prose Composition,
English Composition,
Declamation,
Algebra, (completed),
Geometry, (Davies').

SOPHOMORES.

FIRST SESSION.

Horace,
Homer, (Odyssey),
Greek and Latin Exercises,
English Composition,
Declamation,
Geometry, (completed),
Trigonometry, (Plane and Spherical.)

SECOND SESSION.

Cicero de Oratore,
Orations of Demosthenes,
Greek and Latin Exercises,
English Composition,
Declamation,
Mensuration of Surfaces and Solids,
Surveying and Navigation, (Davies'),
Analytical Geometry, (Church's.)

JUNIORS.

FIRST SESSION.

Tacitus, (Germania and Agricola),
Sophocles, (Antigone),
French Grammar, (Ollendorff's),
Greek and Latin Exercises,
Rhetoric, (Blair's),
Themes,
Analytical Geometry,
Chemistry, (Silliman's.)

SECOND SESSION.

Plautus,
Aeschylus, (Prometheus),
Modern Languages,
Logic, (Hedge's),
Political Economy,
Mineralogy, (Dana's),
Botany, (Wood's),
Natural Philosophy—Mechanics, Hydrostatics,
Pneumatics, Acoustics, (Olmsted's.)

SENIORS.

FIRST SESSION.

Greek Testament,
Cicero de Officiis,
Modern Languages,
Mental Philosophy, (Upham's)
International Law,
Zoology,
Natural Philosophy—Electricity, Magnetism, Astronomy,
Optics.

SECOND SESSION.

Portions of Greek and Latin reviewed,
Modern Languages,
Natural Theology,
Moral Philosophy, (Wayland's),
Evidences of Christianity,
Geology,

All students pursuing the regular College course, will have an opportunity of studying one or two modern languages. The dialects taught are the French, Spanish, Italian, and German.

In place of the Greek language, two modern languages may be substituted, and the student admitted to the usual collegiate degrees. In this case, however, an extra fee of \$10 per session will be charged.

Ollendorff's Series of Grammars in Modern languages will be used; and in Latin, Greek, and English, Bullions' Series has been adopted.

Elementary instructions in Hebrew will be given to those who may desire it.

ENGLISH—SCIENTIFIC COURSE.

By a recent act of the Board of Trustees, arrangements have been made whereby students may, hereafter, take a course of study consisting purely of the English branches. The time prescribed for completing this course is *three years*. The studies to be pursued consist of all the branches now laid down in the course of college instruction, excepting the Ancient and Modern languages.

Students, who shall have completed this course, may receive an English Diploma.

PREPARATORY SCHOOL.

Course of Study.

A regular course of instruction in this department will embrace four years, and be given in four classes.

PRIMARY CLASS—FIRST YEAR.

Orthography,
Reading,
Penmanship,

Geography,
Mental Arithmetic,
(Colburn's.)

SECONDARY CLASS—SECOND YEAR.

English Grammar,
Reading,
Penmanship,

Mental Arithmetic,
English Composition,
Declamation.

JUNIOR CLASS—THIRD YEAR.

Intellectual Algebra,
English Grammar,
Latin Grammar, (Bullions'),
Latin Reader, "
Arnold's First and Second Latin Book,
Greek Grammar, (Bullions'),

English Composition,
Geography, (reviewed,)
Latin Reader, (continued,)
Greek " (Bullions')
Declamation,

SENIOR CLASS—FOURTH YEAR.

Arithmetic,
Greek Grammar, (Bullions'),
Ancient Geography,
Cesar's Commentaries,
Virgil.

Davies' First Lessons in Algebra,
Greek Reader, (continued,)
Composition,
Declamation,

For advanced standing, the candidate must be prepared to pass a satisfactory examination in the previous studies of the class for which he proposes to enter.

It is desired that students present themselves for admission at the beginning of the session. The students in this department are subject to the laws enacted for the government of undergraduates.

CHEMISTRY AND GEOLOGY.

Chemistry will receive its full share of attention. Important additions have lately been made to the apparatus, and will hereafter be made, as our necessities may require. We are free to say, that the opportunities of acquiring an elementary knowledge of this useful science, are fully equal to any in the West.

Owing to the importance and interest that Geology is assuming, especial pains have been taken to make the Department complete in this respect. It is our desire, to make the study as practical and useful as possible; for this reason, Prof. Safford has been devoting much time and labor to the development of the geologic basin of Middle Tennessee. We refer to this, because, with the coal measures of the Cumberland mountain, almost in sight, and the Cretaceous and Tertiary rocks, not far westward, a better type of the entire geology of the Mississippi valley is nowhere to be found within the same compass. Such is our field for *geological excursions*. It has been our aim, also, to build up a good cabinet of fossils, which, already, in many respects, is not surpassed by any in the South West.

TUITION FEES.

The fees for tuition must, in all cases, be paid in advance, and a receipt obtained from the Treasurer, to be presented to the President. Those entering under scholarships, and as ministers or candidates for the ministry, will obtain from the Treasurer, a certificate of that fact, which will also be presented to the President. Such receipts or certificates will be requisite for admission into College. Without such certificate or some

other satisfactory arrangement with the Faculty, no student will be permitted to recite in the college classes. By the recent action of the Trustees, the Faculty will hereafter be held responsible for the tuition fees of those who may be admitted to recitation, in violation of this provision, and the rule will *be strictly* enforced.

EXPENSES.

These will vary with the habits of the students. The following will show the principal *necessary* expenses:

Tuition Fee in Preparatory Department, per session of five months, \$10 for the studies of the 1st, \$12 50 for the 2nd, and \$15 for the 3d and 4th classes.	
Tuition Fee in College Proper, per session, 1st and 2nd classes.....	\$20 00
Junior and Senior classes.....	25 00
Boarding, including lodging, washing, fuel, and lights, per week, in town.....	2 50
In the vicinity.....	1 50
Room rent in College building, per session.....	3 00

A fee of one dollar and a half per session is paid by each student for contingent expenses.

There are some minor expenses, which result from taxes voluntarily imposed by Classes, or Societies. In other incidental expenses, if money is furnished, or permission given to contract debts, a student may be extravagant. To guard against this, it is earnestly recommended to all parents and guardians, not to authorize the obtaining of credit, unless under the special supervision of some friend. Boarding can be procured at the above prices in the most respectable families in the place.

SESSIONS AND VACATIONS.

Recent changes have been made in the sessions and vacations. The Collegiate year is divided into two sessions. The winter session begins the 3d Monday in September and terminates on the 3d Thursday of February. The summer session begins on the following Monday, and terminates on the 2nd Thursday in July—which will hereafter be commencement day.

The next Collegiate year, however, will begin, as formerly, on the 1st day of October.

ADVICE TO PARENTS AND GUARDIANS.

1. When you send your son or ward to the University, signify in a letter to the President whether he is to take a regular or irregular course; and if the latter, what particular branches he is to study. This will prevent those frequent and pernicious changes so common with boys left to their own will. A regular course is earnestly recommended to all whose circumstances will permit them to take it; but, if such be the desire of the parents or guardians of students, any particular branch of literature or science will be taught; but each student must have his whole time occupied.

2. The occasions should be very rare that you would consent for your son or ward to leave the University, during the Sessions, on visits home, or otherwise. This is apt to be allowed during the Christmas holidays, without sufficient regard to the effect it may have on the studies of the whole session. The Faculty generally allow a few days at Christmas for recreation—as much time as they think it safe for the students to lose from their studies.

3. Do not put much money into the pocket of your son or ward, nor allow him to contract unnecessary debts. Send him always, if practicable, at the *beginning* of the Session. He should answer to his name in the Chapel, at 10 o'clock, on the day of opening.

REGULATIONS IN REGARD TO THE PATRON.

The *Patron* will take charge of all the funds of those non-resident students, whose parents, or guardians, may desire to avail themselves of his services, and disburse such funds in compliance with instructions given by the Parents or Guardians, provided the same be not inconsistent with the laws of the University.

No student, under the Patron-law, will be allowed to contract any debt, without permission from the Patron, or from a parent or guardian; and all bills, paid by the Patron, must contain a distinct specification of every item of expense, or article paid for, with the student's name endorsed thereon by himself, as evidence of such expenditure, or that he has received the articles specified; and all accounts must be receipted.

The Patron will give receipts for all funds placed in his hands, and will enter the same in a book, kept by him for that purpose. He will

also enter the amount of each account, and item of expense, so as clearly to show his receipts and disbursements; which book shall be subject, at any time, to the inspection of any of the Trustees or Faculty, and also of the parents, or guardians, or students.

The Patron, before entering upon the duties of his office, is required to give to the Board of Trustees bond and security, approved by them, for the faithful discharge of his duties. He may retain, for his services, five per cent on all funds placed in his hands under the foregoing provisions.

It is to be understood, however, that there is no absolute requisition upon students, to place their funds in the hands of the Patron. It may be done, or not, as parents and guardians may desire. The Trustees only design to afford parents the means of protecting themselves against the extravagances of their sons.

Josiah S. McClain, Esq., of Lebanon, has been appointed Patron, and is confidently recommended to parents and guardians, as a gentleman in whose discretion and fidelity entire confidence may be placed.

THEOLOGICAL DEPARTMENT.

The General Assembly of the Cumberland Presbyterian Church, at its last session, having established a Department of Theology in this University, the Trustees have resolved to open the same for the reception of students at the beginning of the next Collegiate year, on the 1st day of October. One or more Professors will be appointed before that time to enter then upon his or their duties. The friends of the enterprise will be called upon, in the intermediate time, to raise the amount necessary for salaries. It is not doubted that the whole church will come up to this work with a zeal and liberality, which will at once put this Department in successful operation, on a permanent foundation. It will be borne in mind that Theological students are not to pay any fees, and therefore all salaries, and other expenses, are to be made up by subscription, and rendered sure and permanent by an ample endowment. The Trustees cannot allow themselves for a moment to doubt the ability and willingness of the church to do their duty promptly in this important movement, by the success of which the character and efficiency of our ministry will be so vastly increased.

School of Surveying and Civil Engineering.

This school is intended to supply, in part, the demand created by our numerous railroad enterprises for *well instructed* Engineers. It is conducted by Prof. Stewart, but has no connection with the regular classes of College.

The Course of Study embraces:—

1st. A COURSE OF MATHEMATICS, viz: Algebra, Geometry, Plane and Spherical Trigonometry, Mensuration, Surveying, Descriptive Geometry, the theory of Shades, Shadows and Perspective, and (when desired by the student,) Analytical Geometry and the Differential and Integral Calculus.

2nd. A COURSE OF ENGINEERING; Comprising Mechanics, the location and construction of Roads, Railways and Canals, the nature and properties of building materials and their applications to Masonry, Bridges, etc., and Architecture. Special attention will be given to Draughting, and the practical use of the Compass and Chain, Theodolite, Level, and Transit Instruments.

Students who desire only to qualify themselves for land surveying may confine their attention to that part of the above course necessary for that purpose. Those who wish to qualify themselves to *teach* the mathematics, will find the course of mathematics prescribed above as complete as that taught in any of our Colleges.

On entering this school, students will be classed according to their advancement. From two to three years will be required to complete the whole course of study, by those who have made little or no preparation; from one to two years by those more advanced. Those who complete either the course of Mathematics, or that of Engineering, or both, will receive a certificate of the fact, signed by the President of the University and the Professor who conducts the school.

The fee for instruction in this school is \$30 per session, to be paid in advance, and the students will be subject to all the laws of the University regulating conduct and morals, and to those prescribed for the government of resident graduates.

The next session begins on the 1st October, and ends the 3d Thursday of February, and the session after, begins the Monday following the 3d Thursday of February, and ends the 2d Thursday of July.

LAW SCHOOL.

Course of Study.

Two years is the time regularly required to complete the course of study. Students may, however, enter at any stage of their professional studies, and complete their course in two or three sessions, according to their degree of advancement when they enter, and the diligence with which they afterwards apply themselves.

The following works constitute the course:

FIRST SESSION.

Preliminary Tracts, (by one of the Professors.)
Blackstone's Commentaries,
Stephen's Pleading,
Greenleaf on Evidence.

SECOND SESSION.

Kent's Commentaries,
Chitty on Contracts,
Long on Sales,
Story on Promissory Notes,
Story on Bailments.

THIRD SESSION.

Story on Agency,
Story on Partnership,
Story's Equity Jurisprudence,
Story's Equity Pleading,
Angell on Limitations,
American Criminal Law, by Wharton.

FOURTH SESSION.

Story on Bills of Exchange,
Story on Conflict of Laws,
Greenleaf's Cruise's Digest,
Williams on Executors,
Clancy on Husband and Wife,
Story on the Constitution.

A collateral course is prescribed for the private reading of those who are able to accomplish more than the regular course.

Students have to supply themselves with books, which can always be procured in the Lebanon book-stores on reasonable terms.

SESSIONS.

The next session will commence on the first Monday in October, 1852; afterwards the collegiate year will commence on the third Monday in September, and end on the second Thursday in July, and will be divided into two sessions; the first session commencing the third Monday in September, and ending the third Thursday in February; the second session will commence the succeeding Monday.

TERMS OF ADMISSION.

No previous professional reading or literary qualification is required for admission. Those, however, who may apply for advanced standing will be examined on the text already studied by the class which they may propose to enter, in order to decide whether they are prepared to do so.

CLASSES.

There are two classes in the school, the junior and senior, and each class is divided into two sections. Those who commence their law studies in the school, and prosecute the regular course to graduation, will be one year in each class. Those who take advanced standing on their admission will be a proportionably less time.

If a student from any cause should not be able to remain in the school two years, we think he will find it greatly to his advantage to commence his studies in the school, rather than to aim by private reading to prepare for such advanced standing. In the class he will learn how to study law; light will be thrown upon his way, and he will travel it much more easily.

Students in either class may attend the exercises of the other, and enjoy all the advantages they can derive from both. And after they have graduated, they will be allowed the privilege of reciting with any of the classes in the school.

EXERCISES OF THE SCHOOL.

Two tracts have been prepared by one of the Professors; the first, containing the History of a Law Suit in the Circuit Court of Tennessee, noticing, incidentally, the jurisdiction and mode of proceeding in each of the other courts; the second, presenting a plain view of the organization of the Federal government and that of the State of Tennessee—together with an examination of the constitutional provisions of each, with a brief account of the officers of each, and their duties. These works are regarded as preliminary to the regular course of study, and when they are understood, the student enters upon the regular course, and commences the practice of Law in the Moot Courts.

1. RECITATIONS.—The students of each class are examined closely, every day, on the text books—each student being called upon to answer questions propounded to him. This is the most constant and prominent exercise of the school. It is deemed the most profitable method of instruction, and is the only certain test of proficiency. It is a powerful stimulus to study; for it is impossible that a student who has any pride of character, can fail to apply himself diligently, and make respectable progress, when he is thus brought daily into comparison with his fellow-students.

2. LECTURING.—No regular course of Lectures is delivered by the Professors, nor will they be relied upon as a mode of instruction. Brief explanations, and illustrations of the text during the progress of the recitation, have been deemed more profitable to the students. The decisions of the Professors upon the great variety of points that arise incidentally, in the progress of the Moot Court cases, and the charges addressed to the juries that decide them, constitute another form of useful and practical lecturing.

3. MOOT COURTS.—Of these, the Professors hold a Law Moot Court, and a Chancery Moot Court. The students begin practice in the former, where each one commences a suit and takes it through all its stages; some other student appearing in defence. In its progress, all the variety

of incidental points, in pleading and practice, arise, which belong to the history of a real suit. Declarations, pleas in bar, and pleas in abatement, demurrers, amendments, trials before juries of the students, motions for new trials, bills of exception, appeals and writs of error, summary judgments, writs of supersedeas and certiorari and execution, are all involved in the practice. Cases are so framed as to require the parties to prepare notes, deeds, wills, records, depositions and all kinds of documents, to be used as evidence in the trials.

In the Chancery Moot Court, the case is prepared and furnished by the Professor, in the form of depositions of various witnesses, containing the evidence upon which the cause is to be decided. Two students are assigned for the complainant, and a like number for the defendant. The case must be stated before the bill is filed, in order to understand the narrative of facts to be deduced from the proof, and the head of equity jurisdiction to which the case belongs. Then, in the progress of the cause, the students are exercised in drawing the original bill; in filing amended and supplemental bills; in demurrers, pleas, answers, cross bills, &c.; and, when the cause is heard, the party who succeeds is required to draw up the decree as ordered by the Chancellor. In this court, the students alternately act as Clerk and Master, and a regular rule-docket is kept.

A Supreme Moot Court is held at the end of each session, in which the Professors, associated with distinguished lawyers, preside as judges; the causes intended for this court having been decided below, by the more advanced students. In this court, each student appears in some case that is brought up from the Circuit and Chancery Moot Courts, and these causes are heard and disposed of according to the practice of the Supreme Court of Tennessee.

A Moot Court is held once a week throughout the session, at which one or more suits are tried. Each student is required to present an entry in his own case, showing how it was determined in the Moot Court. Thus when he comes into actual practice, he will be qualified to see that the Clerk does his duty. He thus learns, too, the legal effect of every step which is taken in his case. He is also required to present entries in the cases in which the law allows summary judgments. By this means, it is believed, he learns more effectually than by any other, what the law requires to be proved in such cases. He acts, in fine, as attorney, clerk and sheriff, in such a variety of cases, that he cannot fail, with proper attention, to become conversant with the duties pertaining to each of these offices.

To carry out this plan of instruction efficiently, and that it may be enlarged and improved, it is deemed necessary, that at least two Professors should devote their whole time to it. Judge Green having resigned his seat upon the Supreme Bench, will in future give his undivided attention to the school. Judge Caruthers having been one of the Circuit Judges

of Tennessee for many years, resigned his office in 1847, and has ever since devoted his exclusive attention to it, and will still continue to do so. Judge Green was for several years one of the Chancellors of Tennessee, prior to his elevation to the Supreme Bench of the State. It will thus appear that the official experience of these Professors has been such as was calculated to make them familiar with the laws of practice in all the courts of original and appellate jurisdiction, and to qualify them for imparting ample practical instruction in the various departments of civil, criminal and equity law.

Hon. Bromfield L. Ridley, one of the Chancellors of Tennessee, will render such assistance as may be demanded by the exigences of the school.

EXPENSES.

The tuition fee is \$50 per session, to be paid invariably before admission. A proportional deduction is made when the student enters at an advanced period of the session, except for the first week. No part of the fee is refunded on any account; but a due allowance may be made for sickness or approved absence, to be deducted from the students own admission fees for any subsequent session.

Boarding is about \$50 per session, including washing, fuel, rooms and every necessary incident.

OPENING ADDRESS.

By invitation of the class, the Hon. JOHN BELL delivered an address to the school at the opening of the present collegiate year. Ex-Governor AARON V. BROWN has accepted their invitation to deliver an address at the opening of the next collegiate year, on the 3d day of October, 1852.

THE UNIVERSITY.

LAWS IN REGARD TO TEMPERANCE.

No student, in any Department of this University, shall become intoxicated, or induce others to become so, or keep, in his room, intoxicating drinks, or frequent a tipling-house; nor shall students assemble in companies of two or more, at any house, room, or place, to drink intoxicating liquors, or, being so assembled, engage in drinking, gambling, or any disorderly conduct. Nor shall any student be guilty of any disorder, or uproar, or of making loud noises, by night or day, to the annoyance of the citizens, or more orderly students.

The penalty for a violation of any of these laws, shall be reprimand, information to parents or guardians, suspension, or expulsion, at the discretion of the Faculty; except that the sentence of expulsion shall not be pronounced without the sanction of the Board of Trustees.

HEALTH OF LEBANON.

Lebanon has been unusually healthy since the cessation of the cholera in 1849. And as conclusive evidence of the general healthfulness of the place, we adduce the fact that, from the establishment of the Institution to the present time, a period of eight years, there have been but two deaths among the students.

OUR PROSPECTS.

Eight years have elapsed since the institution was chartered, and, at no former period in its history, have its prospects been so flattering as at the present. It has, from its first organization, to the present time, enjoyed a liberal share of public patronage. The constant aim of the Board of Trustees has been to maintain a Faculty of unquestionable competency; and they flatter themselves that, in this respect, the Institution may challenge a favorable comparison with others. They trust, therefore, that they may now confidently appeal to its friends to rally to its support with renewed spirit and energy.

But, though, in view of the past, there is much that is encouraging, yet much still remains to be done, to give it that full measure of usefulness and prosperity to which it should aspire. The Library and Apparatus should be enlarged. New and important Departments should be organized. The maintenance of Professors should be secured against contingencies. To accomplish these ends, we call upon the friends of education, and especially upon the advocates of an intelligent and efficient ministry, and upon the church which began, and has thus far so liberally fostered the enterprise, to give it all the aid that is necessary, to effect the most perfect success.

Alumni of Cumberland University.

The degree of *Master of Arts* has been conferred on all those entitled to it:

NAMES.	OCCUPATION.	RESIDENCE.
1843.
